<sup>1</sup> Identified viewpoints are within 150 feet of the visually sensitive resource boundary. If no viewpoint number is indicated, no photos were obtained near this resource during fieldwork.

<sup>2</sup> For resources with potential PV panel visibility, distance zone is based upon where potential PV panel visibility occurs within the resource boundary. For resources within potential PV panel visibility, the distance zone is based upon where the resource boundary occurs within the VSA.

<sup>3</sup> Trails that occur within state lands and other recreational resources are not identified individually, and are evaluated within the Visual Impact Assessment as part of the overall resource.
